PURE MONSTER SOUND[®]
FOR THE MUSIC INDUSTRY

**PURE
MONSTER
SOUND[®]**

 MONSTER[®]

Monster ProLink® Cables For Professional Applications and Musical Instruments.

“With Pure Monster Sound®, I’m going to take you to the other side of the studio glass, to the musician’s side. Like being on stage, without the microphone.”

Noel Lee. The Head Monster.

Since 1979, Monster has been improving the music. The result of our work is Pure Monster Sound. In headphones, speakers and instrument cables, everything we do, demonstrates our commitment to the Pure Monster Sound experience.

And nowhere is this more relevant than in our Pro MI products. Instrument cables. Patch cables. Microphone and speaker cables. These are tools for musicians: players, singers and producers who are ultra sensitive to sound. They know that cable is the bedrock of a reliable, high-end sound. We’ve been working with professional musicians for over 30 years and there’s a reason for that: the sound.

As the Head Monster stated above, Pure Monster Sound® delivers a wide dynamic range to deliver the punch and realism of a live performance, and well balanced frequency response so that no detail is lost. Pure Monster Sound® is about getting closer to the music.

35 Years of Innovation and Revolutionary Ideas.

Let’s keep in mind who we’re dealing with here. Back in 70’s, Noel Lee had some convincing to do. Which he did. He proved beyond any shadow of a doubt, that cable matters. That gauge, windings and numerous other factors make a very obvious difference in audio quality. That led to Monster Cable, which led to an entirely new industry in which we are still the leader. Our legacy of creativity and innovation continues.

Some of the Monster Cable® Technologies

24k Gold Contact Connectors deliver maximum signal transfer (especially low-level signals), extra-durability and corrosion resistance.

Duraflex® Protective Jacket resists high and low temperatures, provides long-lasting reliability, durability, and flexibility when routing.

MicroFiber® Dielectric-Wrapped Wire Networks for faster transient response, maximum clarity, improved definition and greater presence. An intricate process winds an air-core fiber around each individual conductor to reduce dielectric losses and distortion.

3-Way or 2-Way Time Correct® Windings separately guide the bass, mid and high frequencies to prevent phase shift and time delay for more coherent reproduction of the delicate harmonic structure of music.

Monster® is the Cable Choice for Musicians and Recording Professionals

Top recording engineers, mastering engineers, producers, and musicians choose Monster because Monster’s patented cable technologies meet all their performance and recording requirements. Simply put, Monster makes a powerful difference in their work. And, it fits comfortably within a budget. All of which makes Monster a valuable investment for any musician, studio or facility. Audio professionals choose Monster. Make Monster your choice too for the best possible audio reproduction.

NO ROOM FOR CELEB LIST and PHOTOS

Monster Cable® Prolink® Studio Pro™ 2000

As a reference cable, our SP2000 cables speak for themselves. After all, 'reference' means that in evaluating cables, you have to have a 'best'. Something by which all others are measured. For many years and for thousands of performers and music professionals it's SP2000. It's our flagship and just two of the features that set it apart Include Time Correct® windings and multi-gauge high and low frequency wire networks. For players, producer and engineers no sound goes unnoticed. Which is why SP2000 cables always are.

Studio Pro™ 2000 Instrument Cable

Monster's Flagship Cable Featuring Our Most Advanced Technologies for Ultimate Performance.

Studio Pro 2000 features 3-way Bandwidth Balanced construction, patented MicroFiber® dielectric insulation and Time Correct® multiple gauge wire networks for ultimate balance and accuracy. It's the reference cable for both artists and engineers.

- 1 Custom Monster® connector with 24K gold contacts
- 2 Ergonomically contoured heavy-duty shell
- 3 *Time Correct*® Windings
- 4 *MicroFiber*® wrapped networks for more clarity and presence
- 5 Multi-Gauge high and low frequency wire networks
- 6 95% coverage copper braid and carbon-infused dielectric

Studio Pro™ 2000 Speaker Cable

The Ultimate Speaker Cable for Critical Listening.

Delivers ultra-high resolution audio signals to speakers in control rooms, for monitor speakers, amp/head speaker combinations and sound reinforcement. Features include Magnetic Flux Tube, heavy gauge Bass Control Conductor, heavy gauge copper and Duraflex® black jacket. Wide selection of termination options including Monster designed XLR and Speakon connectors.

- 1 24kt gold contacts for improved signal transfer
- 2 Precision *Time Correct*® windings with separate wire networks provide excellent soundstage performance
- 3 *Magnetic Flux Tube*® improves bass response for natural sound
- 4 Heavy-gauge bass control conductor improves punch and dynamics
- 5 Available in ¼" and Speakon terminations

Studio Pro™ 2000 Microphone Cable

Used by Grammy®-Winning Recording Artists.

Monster's ultimate performance standard for both studio and live applications. Uses three *Time Correct*® multiple gauge wire networks for extreme accuracy, and it is ultra-quiet. Carbon polymer shielding minimizes handling and vibration noise. Heavy-duty black nylon mesh jacket provides maximum durability and visual appeal.

- 1 Custom Monster® XLR connections with 24k gold contacts
- 2 *Time Correct*® Windings
- 3 *MicroFiber*® dielectric preserves highs and improves transients
- 4 *MultiTwist*™ construction with 95% copper braided shielding

Monster Cable® ProLink® Rock. Bass. Acoustic.

We call them application specific, which means that each of these cables is designed for a specific kind of instrument or playing style. Bass. Acoustic. And Rock. Every player puts in hundreds of hours to bond with their instruments. Monster wants to see that the rewards of that effort are protected and never altered. As you would expect, Monster Bass is about solid core conductors and extremely fast transients. Acoustic is warm and natural specifically designed to deliver harmonics and sustain. Rock? If you're going to burn down the house, do it with Monster Rock.

IMAGE FPO - NEED HIRES IMAGE

Monster Rock® Instrument Cable

High Performance Cable Delivers Aggressive Sonic Character and Dynamics for Rock Musicians.

Preserves fast transients, clean highs, and vivid harmonics. Ergonomically shaped connector lets you quickly plug in and out. Made to accent the raw power of your sound and cut through the mix!

- 1 Multi-gauge wire networks
- 2 Solid core center conductor
- 3 Carbon-Infused Polymer minimizes handling and vibration noise
- 4 95% copper braided shield
- 5 Duraflex® protective jacket

Monster Bass® Instrument Cable

Powerful Low End Response and Extended Dynamic Range From a Cable Specially Designed for the Bass Player.

Provides extended low frequency response, faster transients and wide dynamic range. Two thick, solid core bass conductors improve voltage and current transmission for maximum punch and an extended low end. Tapered connector is easy to grab.

- 1 Custom Monster® ¼" connectors with 24k gold contacts
- 2 Durable, easy-grab barrel design
- 3 Multi-gauge wire networks
- 4 Carbon-Infused Polymer minimizes handling and vibration noise
- 5 Ultra dense shielding
- 6 Duraflex® protective jacket

Monster Acoustic™ Instrument Cable

Natural Sound Reproduction and Real Wood-Grain Look for Acoustic Guitars.

A high performance, acoustic-specific instrument cable designed to deliver the warmth, harmonics and sustain of your guitar with precision and clarity. Real wood-grain connector matches the look of acoustic guitars.

- 1 Custom Monster® connectors with 24k gold contacts
- 2 Multi-gauge wire networks
- 3 MicroFiber® dielectric preserves highs and improves transients
- 4 Carbon-infused polymer minimizes handling noise
- 5 95% copper braided shield
- 6 Duraflex® protective jacket

WOOD-GRAIN?

Monster Cable® Prolink® Performer 600

The only way you can call these entry level cables is if you want to enter the world of professional audio, sound great and be very smart about your budget. Built to weather the rigors of stage and touring, every Performer 600 cable is made with our Duraflex® Jacket to resist cuts and abrasion. Heavy duty shielding for low noise and special copper windings provide a well balanced sound. They also feature Monster designed nickel-plated brass connectors. Prolink Performer 600 outperforms anything in its class.

Performer 600 Instrument Cable

Road Worthy Instrument Cable Built for the Touring Musician

Gigging or touring can be tough on an instrument cable. Cables get cut. Connectors break. All of a sudden there's hum and crackle where your guitar should be. Performer 600 Instrument Cable is made for abuse. Monster's Duraflex® jacket protects the cable and heavy duty shielding protects your signal.

- 1 **Durable hard nickel-plated contact connectors**
- 2 Special copper windings for great clarity over long runs
- 3 Heavy-duty shielding for excellent noise reduction
- 4 *Duraflex®* protective jacket

Monster® Performer 600 Speaker Cable

Advanced Technologies in a Pro Audio Speaker Cable.

Get Time Correct® windings, increased conductor area for better power transfer and twisted pair construction to eliminate hum. Perfect for amp head/ speaker set-ups and sound reinforcement. Available with 24K gold contact ¼" plug, dual bananas or Monster designed XLR connectors.

- 1 Reliable nickel-plated brass connector
- 2 Time Correct® Windings
- 3 Magnetic Flux Tube® for natural sound
- 4 More copper for better power transfer
- 5 Duraflex® protective jacket
- 6 Available in ¼", Speakon, and Faston terminations

Monster® Performer 600 Microphone Cable

High Resolution Professional Microphone Cable for Improved Performance.

Delivers excellent vocal and instrument reproduction, and is best price/performance "buy" for recording and performing artists. Multiple gauge wire networks, high density braided shield, protective Duraflex® jacket. It's all designed to bring out the vibrant harmonic overtones of vocals or any miced instrument.

- 1 Custom Monster® XLR connectors provide durability and style
- 2 MicroFiber® dielectric increases transient response time
- 3 Carbon polymer shielding minimizes handling noise
- 4 High-density braided shield reduces interference
- 4 Duraflex® jacket offers maximum flexibility and protection

MONSTER CABLE

MONSTER CLASSIC™

INTRODUCING MONSTER CLASSIC

Head Monster Noel Lee has been an engineer, a professional drummer and an audiophile and of course, an entrepreneur. In the late '70s he put all these skills together and designed the first premium pro audio cable line. By partnering with major performers and producers, he continued to refine the products that have now become world standards. Now, due to popular demand Monster is re-releasing the original instrument, speaker and mic cables. Same great sound. Same great look. Incredible value.

“ My sound is real basic: Les Paul. Monster Cable. Marshall. When I used to use other cords, I'd hear my tone drop as soon as I plugged 'em in. Now, I don't even think about it. ”

Famous Monster
Slash

photo by ????

MONSTER CLASSIC™ INSTRUMENT CABLE

QUALITY SOUND STARTS WITH QUALITY CABLE.

You can tweak your guitar, your amp and your pedals forever, but if your cable doesn't deliver, there's a weak link in the chain. Monster Classic is a great entry-level cable for gigging, tracking in the studio, or jamming in the garage. Professionals know cable makes a difference... that's why so many use Monster. Monster Classic delivers the quality, durability, and reliability every musician needs.

- ① 90% Copper spiral wrap shielding
- ② Duraflex® jacket protects against abrasion
- ③ All metal, classic connectors

MONSTER CLASSIC™ SPEAKER CABLE

MONSTER® SPEAKER CABLE FOR EVERY MUSICIAN AND STUDIO.

Monstrous® sound for Monstrous® musicians. Durable and flexible with heavy-duty reinforced connectors to stand up to studio and stage. Choose hard nickel contact ¼" plug, or SpeakOn Monster banana plugs.

- ❶ Nickel plated brass connectors for excellent signal transfer
- ❷ *Magnetic Flux Tube®* construction and special cable windings
- ❸ All metal, classic connectors for durability

MONSTER CLASSIC™ MICROPHONE CABLE

MONSTER® QUALITY, ECONOMICALLY PRICED MICROPHONE CABLE.

A Monster®-quality microphone cable every musician and studio can afford. Features flexible Duraflex® outer jacket, interchangeable color XLR connector "O" rings, heavy-duty reinforced connectors and Monstrous® sound for Monstrous® musicians.

- ❶ Twisted pair construction reduces distortion
- ❷ All metal, classic connectors for durability

Monster Cable® Prolink® Instrument Cable

There's a Monster Cable for Every Budget and Performance Level. Welcome to Audio Nirvana.

The signal from your musical instrument is delicate, full of nuance and the source of everything else that makes your sound your sound. That's why Monster Instrument Cables deliver exceptional frequency response, tonal accuracy and sonic impact. Why would you ever compromise your sound?

For the best sound, especially with acoustic instruments, it has to be Monster High Performance Instrument Cables. These cables are specially designed to deliver high level transients, complex harmonic overtones and all of the signature detail of your instrument and your playing style.

Monster® Studioliink

Recording studios require the highest possible level of performance from cables. Whether it's an 8-channel mic snake or patch bay cables for the control room, producers and engineers rely on Monster. Our StudioLink cables are specifically designed to meet the critical demands of studio and stage environments, with durable, low-noise heavy-duty construction and advanced cable technologies that consistently deliver maximum signal transfer for more accurate audio reproduction and a lower noise floor.

Monster® StudioLink® Patchbay Cables

Reliable. Durable. Bandwidth Balanced. These cables are ideal for pro studio and home studio patchbays. Built with the patented MicroFiber® dielectric, you get a high resolution signal with increased noise reduction and low-loss performance. Patented Time Correct® windings provide a phase-accurate open soundstage with precise imaging, tight bass and smooth highs. Available with heavy-duty, high conductivity TT, XLR's or 1/4" TRS connectors.

Monster® StudioLink® D-Sub/DA-88 Interconnect

Use the Monster® StudioLink® 500 D-Sub/DA-88 Interconnect for more accurate and natural sound reproduction. Extra-fine copper strandings provide a wide bandwidth and improved signal transmission. Features balanced terminations with XLR or 1/4" connectors for use with multi-channel analog devices.

Monster® StudioLink®

8-Channel and 16-Channel Snake Cable

Monster® StudioLink® 500 8-Channel Snake Cable delivers exceptional performance value for multi-channel professional, live, or home studio applications. Multiple gauge high and low frequency wire networks provide accurate and natural sound reproduction.

Monster® Studioliink Digital Cabels

Handle High Speed Digital Signals with Care

Digital audio signals can be more demanding on cables and their connectors than analog signals because of the high frequency signals. Professional grade digital audio requires very high data rates because an error of a single bit can ruin an otherwise perfect take. Monster Digital™ Cables are designed for precise bitstream transfer and smooth, natural sound, free of jitter, distortion and interference. Get Monster Digital™ Cables for reliable, error-free digital audio.

Monster™ Studioliink USB Cable

- 
- 1 Advanced SingleHelix™ Windings**
Deliver 500MHz bandwidth, and up to 480 Mbps for ultra-fast data transfer rejection.
 - 2 Extra-Flexible Duraflex®**
Patented outer jacket for superior durability and strength.
 - 3 Ultra-Large Gauge, Power Conductor**
For maximum power transfer to USB devices.
 - 4 Heavy-Density Triple Layer Shielding**
Rejects RF and EM interference for most reliable data transfer.
 - 5 24k Gold Contacts and Connector Shell**
Maximizes signal transfer and corrosion resistance.

Monster® StudioLink® Firewire Cable

High speed IEEE 1394 FireWire® connection for enhanced reliability, bandwidth and sound reproduction. Features a unique, advanced nitrogen gas-injected cellular dielectric, Xtra Low Noise® construction and high-density, triple-layer shielding to help reject interference, high conductivity. TT, XLR's or ¼" TRS connectors in 250-foot bulk spools.

Monster® StudioLink® USB Cable

USB is an important standard in many pro audio environments. Connecting controllers with DAW's. Hard drive and storage networks. And you don't need a USB cable that's going to slow things down or lose data. You need Monster® StudioLink® USB cable. Advanced connectivity and throughput meets world famous Monster connectors.

Monster® CableLinks

Professional Quality Audio Couplers, Adapters and Y Adapters

Don't let couplers, adapters and Y adapters be the weakest link in your signal path. Monster® CableLinks use high performance Monster Cable® and extra shielding to eliminate RF and EMI noise .

Ultra Low-Noise, Ultra-Durable Adapters Deliver Optimum Signal Transfer for Better Sound

A cheap adapter can ruin a million dollar mix. Professional audio people know it, and that's why they never skimp on hardware. They specify Monster.

Pro 900

Rack Mountable
Professional PowerCenter
A superb value, PRO 900 provides entry to pro-grade power conditioning and protection for all music professionals. Clean Power Stage 1 filtering means better sound for performing musicians, studios, project studios and home theaters.

SKAM LOGO Lock-up

Pro 600

Rack Mountable
Professional PowerCenter
The PRO 600 is a high quality component at an entry-level price. The filter circuit reduces the noise that goes right through typical surge protectors. Optimized for analog gear, the Pro 600 provides excellent AC power line noise rejection.

Monster® Pro Power

Maybe you have a cover band. You show up at a party and there's one ungrounded outlet across the room behind the sofa. Or you're in a rehearsal space and the manager's coming by for a listen. Noisy amp! Or it's a stage and there's not enough juice for the new PA. You need to become a Monster now. Our power products give you surge protection, noise and RF filtration and as many outlets as you can use. Buy Monster and stop worrying about your power issues....and take more time for music.

“ I only use stuff that still sounds incredible after I've beaten the #x@! out of it. The list is short. Monster's on it.

Protect your sound and your equipment

Let's say you play guitar. Getting your signature tone has taken forever. But you've created something that's unique, personal and in demand. Are you going to let all that work be vulnerable to dirty power? In the same way that cable gets your sound to an amp intact, Clean Power® makes sure that your electronics are running clean and quiet. And with up to 3 stages of noise filtration, Monster® Pro Power provides maximum tone and minimum noise.

More for Your Studio, Stage, and Rehearsal Room

Rely on Monster for all your pro and music performance cable and accessory needs including high-performance pro-grade headphones, bulk high-performance cable, audiophile-class Apple iPod® interconnects, robust studio-grade computer connections and more.

Take the investments you've made in audio to the next level, and Get All the Performance You Paid For™ with Monster and Monster Pro MI!

“ I like to have the signal path as short, direct and analog as possible, so quite often, I just plug a guitar into an amp with a 15 ft. Monster Cable. ”

– Famous Monster Joe Perry, Aerosmith

photo by Ross Hallin

A High Performance Monster PowerLine® Cord Improves Audio Gear

Can replacing the power cord on musical instruments and pro audio equipment really make a difference? A superior IEC power cord reduces noise from RF and EMI, and maximizes power transfer, enabling your electronics to perform at their best.

Monster PowerLine PL 300 (pictured above)

Monster PowerLine 300's two isolated layers of shielding fend off external RF interference, while a tightly woven copper braid protects against EM interference. A drain wire connects the shield to the AC source ground, sending accumulated noise back to the wall plug, lowering the overall noise floor.

- Dual 100% mylar and 95% copper braid shielding
- 8-foot length provides greater flexibility
- 24k gold-plated contacts for maximum conductivity and corrosion resistance

Monster PowerLine PL 200

A superior IEC power cord that helps keep AC impurities out while delivering maximum power, for improved equipment and musical instrument performance.

- 100% mylar foil shield
- 8-foot length provides greater flexibility
- 24k gold-plated contacts

Monster PowerLine PL 100

Power cord reliability is an audio essential. PowerLine PL100 helps keep AC impurities out while delivering maximum power, for improved equipment and musical instrument performance.

- 8-foot length provides greater flexibility
- 24k gold-plated contacts
- Heavy-duty Duraflex® jacket

Monsters Live Forever™

100% Limited Replacement Warranty

Monster® cables are backed by the Monsters Live Forever Limited Warranty. This warranty lasts as long as you own your Monster cable and covers any defects or malfunctions in a new Monster cable that you have purchased from an authorized Monster Dealer. Get all the details when you purchase a Monster cable product.
